OBJECTIVE

Full-stack Web & App Developer. Enthusiast of artificial intelligence, distributed systems, cybersecurity, and other areas of computer science. Always looking out for new technologies to explore and projects to take on. Ultimately interested in helping engineer smarter, more scalable, and secure services and cities.

TOOLS & TECHNOLOGIES

Front-end Technologies

- (Web) JS, HTML, CSS + Bootstrap, Sass
- (Cross-platform) Flutter

Back-end Technologies

- SpringBoot
- Node.js
- Django

Database Technologies

- MySQL
- PostgreSQL
- MongoDB

Languages

C++ Java Python
JavaScript Julia

Other tools

Bash, Git, VScode Astah UML
Tensorflow + Keras Photoshop, Figma

EDUCATION

Computer Science Degree | Universidade Europeia – IADE

2019 – 2022 | 17/20 POINTS

A pragmatic degree, where I learned all the development tools I know through collaborative projects. These include a market web application, an exercise app, a cardiac data tracking and risk detection app for hospital patients in Lisbon, a virtualized fault-tolerant service, and several smaller projects (see my GitHub.)

High School IB Diploma | American School of Rio de Janeiro – EARJ

2017 – 2019 | 31/45 POINTS

Extended Essay on Computer Science, Algorithm Analysis (39/44 pts). Member of the Student Council (VP), National Honor Society, Math Club, Robotics Club (Pres.), Global Issues Network, SOS (hospital charity club), RASA (volunteer teaching club), and more. Volunteered at the 2015 GIN conference, and 2017 AASSA conference.

LANGUAGES

Native English and Portuguese speaker. Intermediate Spanish (DELE B1).
